

Reuse TOYOTA/LEXUS 128-bit SmartKeys (p1=AA)

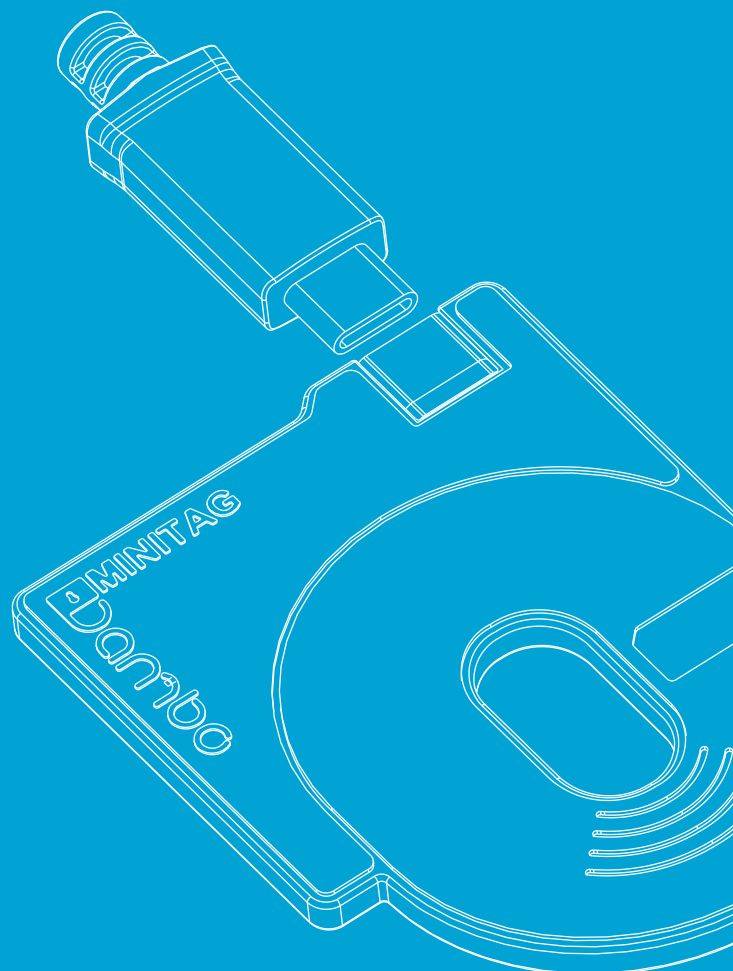

SmartKey Reuse

Emergency Key

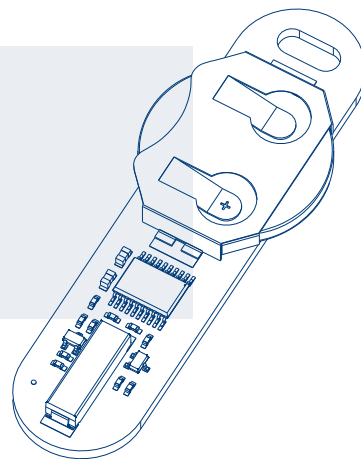

SmartKey copy

Used Toyota/Lexus 128bit Smart Keys (ID8A) with p1=AA cannot be renewed for directly added to the vehicle using the diagnostic equipment. Nevertheless, you can add used Smart Keys with p1=AA to the vehicle using **Dambo KEY TOOL** software and special hardware equipment **DK60-AA**.

DK60-AA is a special wireless small-size device that allows you to emulate Toyota/Lexus 128bit Smart Keys with p1=AA.

DK60-AA designed for multiple use.

DK60-AA together with **Dambo KEY TOOL** allows you to perform the following features:

- Cloning existing Toyota/Lexus 128-bit smart keys with p1=AA
- Make emergency key for All Key Lost operations
- Allows you to use used Toyota/Lexus 128bit smart keys with p1=AA to be added to the vehicle
